

## Lift Units

Kylix have designed and manufactured three types of electrical lift unit model to cater for loads of 30kg, 40kg and 60kg. All models have been developed specifically to allow 1.5m lift and drop utilising ultra quiet belt suspension system in a lightweight aluminium casing. All units include 10m control cable, lift control unit with power cord and plug.

Wall solarium support

## Solarium Supports

Specially designed, heavy duty, galvanised steel mounting brackets have been developed to provide suspension of the solarium in any situation. Options include, solarium suspension between two walls, from one wall only, free standing or from the ceiling.

## UV Lights

Medical quality UV lamps can be fitted to any Kylix solarium during manufacture. UV is recommended for stable kept horses that are lacking exposure to sun light and require generation of vitamin D. Only very short periods of exposure to UV are recommended. Kylix install 2 x 300 watt UV lamps which come complete with a separate UV timer unit.

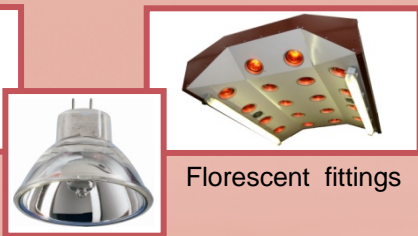

UV lamp

IR lamp

LED lamp

Florescent fittings

Halogen lamp

## Additional Solarium Downlighters

Additional protected fluorescent tubes, recessed LED or halogen lamps can be fitted during manufacture. Additional protected fluorescent tube, LED or halogen lighting counteracts shadowing underneath the solarium unit whilst giving additional lighting for clipping.

## Internally Sprung Cross Tie Posts

Kylix UK have developed a unique a 1.5m high, heavy duty safety cross tie post. The fully galvanised CTPS1.5 is designed with an internal sprung shock absorber with plastic top plate for quiet, low friction action. Supplied with adjustable length cord fitted with panic clip and all concrete floor fixings. Where tie posts cannot be installed rubber cross ties are also available. Traditional Cross Tie Posts Also available.

## Installation Services

Kylix UK have a team of professional installers including qualified electricians where additional electrical services are required to fit and commission your Solarium. All necessary fixings and Solarium hardware mounting systems (excluding steel supports and electrical lift units) are supplied as part of the service.
