What is a YardView closed circuit television system?

Kylix YardView CCTV systems offer the most comprehensive range of CCTV systems specifically designed to meet your individual yard security needs.

YardView is the most sophisticated **Professional-grade** analogue CCTV solution available today allowing you to monitor and record critical areas of your property.

Kylix UK Ltd offer a comprehensive range of solutions from single cameras to multi-site monitored systems with customer portal access, the choice is yours.

Short, medium to long range CCTV

All Kylix UK Ltd systems are supplied as high resolution units and can be hard wired or installed as a fully wireless solution where the installation of cables is either costly or totally impracticable.

Within the confines of the law Kylix UK use fully compliant 5.8ghz microwave technology to transmit audio and video signals with or without high gain antenna where necessary.

For medium to long range applications, small panel antennas plug directly into the camera transmitter, repeater or receiver and can increase reception range from 100m to around 4km dependant upon the site parameters!

All systems are dispatched with all necessary power adaptors and leads for connection to DVR (digital video recorder) or video recorder or your TV as quoted.

Are Kylix YardView solutions cost effective?

Kylix UK Ltd is unique in that we are experienced in CCTV installations, fully understand the technology and the equine environment where security CCTV is required.

Because we are a technical solution provider, we understand very well the market and the products available in it. Kylix UK selects only those products that meet our exacting requirements but are very aware of the competitiveness of products in the CCTV the market place so ensure great competitive value

What can YardView do?

The Kylix YardView range of products include high resolution day/night cameras, 4, 8, 16 or 32 zone DVR's, wireless transmitters/receivers, security lights power supplies, solar panel PSU's and charger to name but a few.

Once installed YardView can be added to easily should you specific property circumstances change.

How can Kylix UK Ltd help with your CCTV solution?

Not only do we build, supply and commission your bespoke YardView system, we also offer a full package installation service to meet your expectations.

Just some of the products available

This comprehensive range of digital CCTV products has been developed to embrace the latest trends and technology whilst maintaining the simple plug and play approach that Kylix UK have always employed.

Every camera in the range has the ability to capture images in both day and night using built in infra red illumination. Possible record times have dramatically increased, data now being held on hard drive instead of tape.

The range is completed by super thin space saving TFT monitors.

Cutting edge design, undisputed reliability, superb value, the mark of an Kylix CCTV YardView system.

TFT monitors with fully integrated DVR

WITNESS 4 17" TFT monitor combined with 4 channel DVR c/w 250GB hard drive space for further drive, network output, USB port, motion detection

WITNESS 9 17" TFT monitor combined with 9 channel DVR c/w 250GB hard drive space for further drive, network output, USB port, motion detection

WITNESS 16 17" TFT monitor combined with 16 channel DVR, c/w 500GB hard drive, network output, USB port, motion detection

Cameras

IRCAM20 Day/night weatherproof external/internal use CCTV camera fixed 3.6mm lens c/w 15m cable

IRCAM100 Day/night weatherproof external/internal use CCTV camera with integral 15m IR illuminators, fixed 6mm lens

IRCAM500 Day/night weatherproof external/internal use CCTV camera with integral 25m IR illuminators, variable 4–9mm lens - requires PSIL-1

IRCAM1000 Day/night weatherproof external/internal use CCTV camera with integral 50m IR illuminators, variable 5–50mm lens - requires PSIL-1

IRDOME Day/night internal use dome camera with integral IR illuminators, fixed 4mm lens

IRDOMEEXT Day/night external use dome camera with integral IR illuminators, fixed 4mm lens

DLC-BRASS Day/night internal use camera in brass downlighter housing with 4mm lens and IR LEDs

Why do I need a PMaX Security System?
Unfortunately the nature of keeping horses nearly always involves the property being situated in a vulnerable, remote location. Security is paramount to ensure you deal quickly and efficiently with the emergency in the event of not just intruders but also fire, flood, panic alarm and 2- way emergency communications.

What is a PMaX Security System?
The Kylix PMaX is the most sophisticated **Professional-grade,** fully monitored, wireless alarm system on the market at present. PMaX detectors and sounders are totally wireless requiring no interconnecting cable! PMaX detectors and sounders have onboard lithium batteries lasting between 3–5 years, making a wireless solution a totally practical one. PMaX provides detectors for a host of detection not just intruder.

How does the PMaX System report emergencies with me?
Kylix PMax with its built-in landline PSTN, and the cellular technology GSM/GPRS communicator modules, ensures reporting of emergency events to your pre programmed numbers or central station as well as text messages keeping you in touch wherever you are.

Is PMaX a cost effective solution?
This versatility, together with its ease-of-use and rapid installation, makes PMax one of the most modular and cost effective security solutions in the industry today. No wired system can offer the flexibility PMaX offers to meet your specific needs.

What can PMaX do?
The Kylix PMaX can accommodate up to 30 wireless detectors, including PIR detectors, magnetic contacts, interface devices to connect conventional detectors or panels, optical smoke detectors, panic buttons, carbon monoxide detectors, natural gas detectors, keyfobs, flood detectors, impact sensors, glass break sensors, keypads, bell boxes, indoor sirens and repeater panels for long distance range to name but a few. Once installed PMaX can be added to easily should you specific property circumstances change.

Kylix UK have produced a PMaX standard kit PMaX-1 which includes:-
- 1 x PMaX-CP central control panel complete with 7.2v nickel metal hydride battery, PSTN landline and GSM cellular communications
- 1 set wireless device lithium batteries
- 1 x fully wireless siren / strobe
- 2 x wireless industrial harsh environment quad PIR detector
- 1 x wireless door contact
- 1 x wireless 2 way keyfob

  Accessories and optional devices can be easily added to your security package which Kylix UK will programme for you before shipping.

What other services are offered?
Not only do we build, supply and commission your bespoke PMaX system as standard, we also offer a full package installation service to meet your expectations.

PMaX Devices Available

Smart Design for Simple Installation

The PMaX Kit requires virtually no cabling even for external sounder/strobes. PMaX is a Plug and Protect system, so a new installation can be completed in less than one hour.

PMaX + Features

• Plug and Protect fast and easy installation
• Optional GSM-based backup communication channel for uninterrupted connectivity even in case of tampering with the system
• Detectors supported: Std, Quad and pet-immune PIR motion detectors; glass-break, flood, smoke and gas detectors; door/window magnetic contact, and many more
• Event reporting to: monitoring stations, pagers, SMS messages, mobile phones and regular phones
• Message center with standard and remote access for voice recording/playback
• Remotely initiated hands-free 2-way voice communication
• Latchkey mode can inform property owner of a clients arrival
• Easy and convenient programming options
• Intuitive textual and audible user interface
• Advanced jamming detection in compliance to highest industry standards
• Full compliance with international standards and regulations.

Technical Specifications

User Codes	8
Battery type:	
Standard	24 hour back up – 7.2V, 1300mAh, NiMH
Optional	48 hour back up – 9.6V, 1800mAh, NiMH
Power Supply	100VAC to 240VAC, 50/60 Hz
Internal PSU	0.5A / 12.5 VDC, 1.6A
Reporting Format Options	SIA, Contact ID and SIA/IP
Weight	1.44Kg (51 oz) with battery
Size	266 x 206 x 63 mm
Rf System	Two-way + diversity antenna

A very comprehensive range of Detectors, Sounder/Strobes, Keyfobs, Interface Transmitters, Repeaters and Keypads are available to add, extend and improve your system.

These can be purchased with your PMaX system and will be programmed by us prior to shipment.

Alternatively you can expand your system at a later date by purchasing the desired device and simply program it to your system yourself. Its pure simplicity.

If you don't feel confident in installing your new system yourself, we provide a full on-site installation, connection and set-up service.

Call Kylix UK to discuss your specific requirements today.
